

# Greased Wheels

Railroads keep their investment in rolling stock running smoothly by maintaining their equipment. Solar generation owners use SolarVu energy portals to monitor and identify problems as soon as they occur then dispatch O&M staff with the right spares to fix problems.

To reduce maintenance costs, a SurePoint subscription now includes a Ticket System for optimal scheduling and detailed maintenance records. Keep track of lifetime repairs on all equipment in your portfolio and schedule truck rolls with one click access from your SolarVu SMART Enterprise account.

Use the new Ticket System included with a SurePoint subscription for O&M scheduling with lifetime records of equipment maintenance. One click access from your SMART Enterprise account for easy access.
